Chairman's Review

Chairman's Review

I am pleased to present the review for the year ended June 30, 2023, highlighting the Company's performance and the role of the Board of Directors in guiding the management to carry out its responsibility for the benefit of all its stakeholders.

During this fiscal year Pakistan's economy faced complex and multifaceted challenges, most notably the commodity shock from the Ukraine war, spillover from the severe impacts of last year's floods, an uncertain political environment, and a sharp increase in headline inflation. There was significant depreciation of the currency and depletion of forex reserves by 40%. The State Bank responded by raising interest rates by 8.25%, and the Government imposed administrative restrictions on imports, increased energy prices, and elevated corporate taxes. However, these fiscal and monetary measures created severe supply chain disruptions leading to a contraction of GDP to 0.29%, and a decline of 10.2% in LSM.

Global steel prices remained uncertain during the year starting from USD 1,075 /MT and tapering off to USD 560 /MT, exerting pressure on margins. The domestic steel industry also witnessed a substantial 36% reduction in the market size on the back of eroding purchase power parity. Furthermore, misuse of sales tax exemption in FATA/PATA continues to negatively impact the local steel industry. This sales tax exemption for FATA/PATA has now been further extended till June 2024 in the Finance Act 23.

Your Company's persevered in overcoming these problems and demonstrated its strength by emphasizing working capital management, resulting in cash generation of Rs. 22.3 Billion from operations and enabling it to reduce overall borrowing by Rs. 16.8 Billion. The company achieved profit after tax of Rs. 3.5 Billion as a result of adopting the above strategy and despite the last minute imposition of Super Tax at 10% of Rs. 486 million.

In line with the Company's vision and mission, the focus of the Company's management will remain on the delivery of quality products and sound business strategy for its overall success. The Company is

fueled by confidence in its fundamental strengths, the quality of its committed workforce, the production systems and effective supply chain management.

The Board has diligently performed its duties and responsibilities and has effectively guided the Company in all its strategic affairs. The Board was essential in reviewing the management performance and focusing on significant risk areas.

The Board recognizes that well-defined governance practices are critical in strengthening corporate responsibility and is dedicated to achieving excellence in corporate governance practices to conserve and sustain stakeholders' value. All Directors, including the Independent Directors, actively contributed to the Board's decision-making processes.

As Chairman of your Company, I will continue to be responsible for leading the Board, fostering a culture of openness and constructive debate during which all views are heard, and ensuring that the Board hears from an appropriate range of senior management. I will remain firmly committed to ensuring that your Company complies with all relevant codes and regulations and that our management team continues to take decisions that will create value for you in the short, medium, and long term.

The Board carried out its annual self-evaluation in line with best practices of corporate governance and found its performance to be satisfactory. The focus remained on business opportunities, risk management, and providing oversight to the management.

The Company has an independent Internal Audit department that follows a risk-based audit methodology. Internal Audit reports are presented to the Board Audit Committee quarterly and areas for improvement are discussed and highlighted.

Your Company is continuously investing substantial resources to further improve working conditions for its employees to provide a safe, healthy, and comfortable working environment.

Chairman's Review

On behalf of the Board, I wish to acknowledge all our employee's contributions to the Company's success. I also wish to thank our shareholders, customers, suppliers, bankers, business partners, and other stakeholders for their confidence and support. The Board looks forward to next year with greater confidence in meeting the challenges ahead.

سربراہی تجزیہ

مجھے خوشی ہے کہ میں ۳۰ جون ۲۰۲۳ کو اختتام پذیر ہونے والے سال کا جائزہ پیش کر رہا ہوں۔ اس تجربے میں کمپنی کی کارکردگی اور انتظامی عملے کو بورڈ آف ڈائریکٹرز کی جانب سے دی گئی راہنمائی اُجاگر کرنا مقصود ہے، جس کے ذریعے تمام حصہ داروں کا مفاد یقینی بنایا گیا ہے۔

گزشتہ مالی سال پاکستانی معیشت متفرق اور پیچیدہ مسائل سے نبرد آزما رہی، بالخصوص مشرقی یورپ میں یوکرین کی جنگ سے پیدا ہونے والے حالات اور اجناس کی قلت سب سے بڑے اسباب بنے رہے، پاکستان میں سیلاب کے تباہ کاری اور غیر مستحکم سیاسی ماحول، انہی گونا گوں حالات کے سبب افراط زر اور مہنگائی کی شرح میں ہوشربا اضافہ ہوا۔ پاکستانی روپے کی قدر میں نمایاں کمی واقع ہوئی اور زرمبادلہ کے ذخائر 40 فیصد تک گر گئے۔ نتیجتاً مرکزی بینک نے شرح سود میں 8.25 فیصد اضافہ کر دیا اور حکومت نے درآمدات پر انتظامی پابندیاں عائد کر دیں، نیز توانائی کی قیمتوں اور کارپوریٹ ٹیکسز میں مزید اضافہ کر دیا۔ لہذا، ان معاشی اور مالیاتی اقدامات کے سبب ترسیل رسد میں شدید رکاوٹیں پیدا ہوئیں جس کی وجہ سے مجموعی ملکی پیداوار (GDP) 0.29 فیصد تک سکوڑ گئی اور وسیع مصنوعات سازی (LSM) میں 10.2 فیصد کمی واقع ہوئی۔

عالمی سطح پر اسٹیل کی قیمت سال بھر غیر مستحکم رہی، جو 1,075 امریکی ڈالر فی میٹرک ٹن سے شروع ہو کر 560 امریکی ڈالر فی میٹرک ٹن ہو گئی نتیجتاً منافع پر شدید باؤ رہا۔ مقامی فولادی صنعت میں بھی قوت خرید کی عدم موافقت کے سبب خرید و فروخت میں 36 فیصد نمایاں کمی دیکھی گئی۔ مزید برآں، فائنا/پائنا میں سبز ٹیکس کی چھوٹ کا بے جا استعمال، مقامی فولادی صنعت پر منفی اثر ڈالتا رہا۔ فنانس ایکٹ 2023 کے مطابق اب یہ انتہائی جون 2024 تک مزید بڑھادی گئی ہے۔

ان مسائل پر قابو پانے کے لئے آپ کی کمپنی نے ورکنگ کپینٹل مینجمنٹ پر توجہ کے ذریعے اپنی ثابت قدمی اور صلاحیت کا مظاہرہ کیا ہے، جس کے سبب آپریشنز سے 22.3 ارب روپے کی نقد آمدنی ہوئی نتیجتاً مجموعی طور پر 16.8 ارب روپے قرض میں کمی واقع ہوئی۔ 10 فیصد سپر ٹیکس کے نفاذ یعنی 486 ملین روپے کے ٹیکس خسارے کے باوجود 3.5 ارب روپے کا منافع بعد از محصلوات حاصل ہوا۔

کمپنی کے اغراض و مقاصد کے مطابق انتظامیہ کی بھرپور توجہ کمپنی کی مجموعی کامیابی کے لئے معیاری مصنوعات کی پیداوار اور ٹھوس کاروباری منصوبہ بندی پر رہی۔ ادارہ کی بنیادی صلاحیتیں، جیسے اس کی پُر عزم اور معیاری افرادی قوت، پیداواری انتظامات اور موثر سپلائی چین مینجمنٹ کا اعتماد، اسے تقویت بخشتی ہیں۔

بورڈ نے جانفشانی سے اپنے فرائض اور ذمہ داریاں نبھائی ہیں اور کمپنی کے تمام تزییاتی امور میں مؤثر انداز میں رہنمائی کی ہے۔ بورڈ نے پُر خطر مسائل پر توجہ مرکوز کرتے ہوئے انتظامیہ کی کارکردگی کا جائزہ لینے میں بھی اہم کردار ادا کیا ہے۔

بورڈ یہ بات تسلیم کرتا ہے کہ بحیثیت کارپوریٹ اپنی ذمہ داری نبھانے کے لئے مضبوط قواعد و ضوابط کا نفاذ نہایت اہمیت کا حامل ہے، یہی وجہ ہے کہ ادارہ اپنے اسٹیک ہولڈرز کے سرمائے کے تحفظ اور استحکام کے لئے کارپوریٹ قواعد و ضوابط میں عمل کی حاصل کرنے کے لئے کوشاں ہے۔ بورڈ آف ڈائریکٹرز کے فیصلہ سازی کے عمل میں انڈیپنڈنٹ ڈائریکٹرز سمیت تمام ڈائریکٹرز فعال کردار ادا کرتے ہیں۔

آپ کی کمپنی کے چیئرمین کی حیثیت سے، میں بورڈ کی قیادت کرتے ہوئے آزادی اظہار رائے اور تعمیری بحث کا ایسا ماحول فروغ دینے کا ذمہ دار ہوں جس میں تمام آراء سنی جائیں اور یقینی بنایا جائے گا کہ بورڈ آف ڈائریکٹرز سینئر مینجمنٹ کی بات مناسب حد تک ضرور سنے۔ میں اس بات کا پختہ عزم کرتا ہوں کہ آپ کی کمپنی تمام متعلقہ قوانین اور ضوابط کی پابند رہے گی اور یہ کہ ہماری انتظامیہ ایسے فیصلے کرتی رہے گی جو مختصر، درمیانی اور طویل مدتی منافع کا سبب بنیں گے۔

بورڈ نے کوڈ آف کارپوریٹ گورننس کے تقاضوں کے مطابق اپنا سالانہ خود اختصائی عمل سرانجام دیا اور اس کی کارکردگی زیادہ تسلی بخش اور بہتر پائی گئی۔ بورڈ کی تمام تر توجہ کاروباری مواقع، رسک مینجمنٹ اور انتظامی نگرانی فراہم کرنے پر مرکوز رہی۔

کمپنی میں اندرونی آڈٹ ایک آزاد شعبہ ہے، جو خطرات پر مبنی اختصائی عمل کو جاری رکھتا ہے۔ بورڈ آڈٹ کمیٹی سہ ماہی بنیادوں پر اندرونی آڈٹ رپورٹس کا جائزہ لیتی ہے، جس میں بہتری کے پہلو اُجاگر کیے جاتے ہیں۔

آپ کی کمپنی اپنے ملازمین کو محفوظ، صحت مند، اور آرام دہ پیشہ ورانہ ماحول فراہم کرنے کے لئے حالات کارمزد بہتر بنانے کے غرض سے خاطر خواہ وسائل کی مسلسل سرمایہ کاری کر رہی ہے۔

بورڈ کی جانب سے، میں کمپنی کی کامیابی میں شریک اپنے تمام ملازمین کے تعاون کا اعتراف کرنا چاہتا ہوں۔ میں اپنے حصص یافتگان، صارفین، سپلائرز، بینکروں، کاروباری شراکت داروں، اور دیگر متعلقین کے اعتماد اور تعاون کے لئے اُن کا شکریہ ادا کرتا ہوں۔ بورڈ آئندہ آنے والے چیلنجز کا مقابلہ کرنے کے لئے بھرپور اعتماد کے ساتھ اگلے سال کا منتظر ہے۔

As we cultivate significant social and cultural ties, our vision encompasses an equitable, enlightened society where individuals can realize their potential with dignity. Since its inception, International Steels Limited has been steadfast in its mission to fuel industrial growth in Pakistan. Directors' Report

The Directors of International Steels Limited are pleased to present the 16th Annual Report accompanied by the audited financial statements for the year ended June 30, 2023.

Global Steel Scenario

- Global steel prices declined by almost **49%** after hitting a record high of **US\$1,100/MT** this year.
- The prices of raw materials, mainly iron ore and coking coal witnessed significant downward adjustments.
- The global market weakened in the first half of the 2022-23 but recovered in the later part of the year to **US\$650/MT**.
- World crude steel production remained at **1.8 billion metric tons** during the year, with a decrease of **5%** as compared to last year's production of **1.9 billion metric tons**.
- China continued to lead the global steel market however, its total production has increased to **1,035** from **1,018 million metric tons** with its overall share in the global output to **56%** from **54%** last year.

National Economy

Pakistan's economy faced severe shocks over the past year, with notable impacts stemming from the consequences of floods, highly fluctuating commodity prices, and tighter external and domestic financing circumstances.

These factors disrupted the post-pandemic recovery and resulted in a substantial rise in inflation and a notable depletion of forex reserves. Conditions were further exacerbated by frequent announcements of temporary plant closures due to challenges in importing machinery and intermediate inputs, leading to raw material scarcities and an economic deceleration.

These actions have reduced the current account deficit to **US\$2.5 billion** from last year's **US\$ 17 billion**. However, they have also led to stricter financial conditions, higher borrowing expenses, particularly for the Large-Scale Manufacturing sector, and suppressed demand.

Business Review

Ukraine's war exerts supply chain disruptions, leading to a spike in global commodity prices.

This inflationary pressure exacerbated the deteriorating foreign exchange reserves of the country resulting in a sharp decline in foreign exchange reserves. The State Bank raised the policy rates several times during the year to curb inflation and imposed import-related administrative measures to conserve precarious exchange reserves.

The import curbs provided an opportunity for the State Bank to curtail the current account balance but restricted the industry's access to procure raw materials which lead to a massive contraction in overall GDP. Similarly, the policy rates hike significantly increased the government financing requirements to curb the budget deficit, which was tackled through the increase of taxes.

The company, however, navigated proficiently across these vulnerable times with a precise focus on effective inventory and cash management. The management further improvised by incorporating operational efficiencies, implementing energy conservation plans, and executing only business-critical capital projects. These measures enabled the company to generate valuable cash and resulted in a reduction in borrowing levels.

The company was able to maintain healthy gross profit margins on the back of inventory rationalization and by increasing its market share in the shrinking economy. Further, productivity initiatives and lean manufacturing approach ensure that costs remained well below all-time high inflation.

Sales

In the fiscal year 2022-23, sales remained a challenge due to substantial **36%** reduction in the overall market size. The market was further impacted due to tax exemptions to manufacturers in the erstwhile FATA / PATA regions. Despite these factors, the company increased its market share to **36%** from **31%** in last year. The sales volume was at **308,000 MT**, including **8,000 MT** from toll manufacturing. Even amidst the challenges posed by the contraction of the North American market and the fluctuations in international steel prices, the company has successfully exported **48,000 MT**.

Furthermore, it's worth highlighting that the company's efforts were recognized with the FPCCI 46th Best Export Performance Award for the year 2021-22 and KCCI Best Export Performance Award for 2019-20 and 2020-21, underscoring its dedication and excellence in exports.

Manufacturing Operations

The company practices Lean manufacturing and Six sigma to drive efficiencies in the production processes and reduce wastages. The current year's production was **304,000 MT** which was in line with sales demand.

The company has proactively undertaken several initiatives to streamline its costs and enhance efficiency through strategic production planning which effectively mitigated the impact of high energy costs during the winter season along with operations in non-peak hours only. This initiative resulted in a substantial energy cost reduction.

Furthermore, innovative packaging solutions and in-house plant maintenance replaced the imported materials resulting in reduced operational costs. These collective efforts exemplify the company's commitment to achieving cost-effective solutions while maintaining operational excellence.

Health, Safety and Environment

The company believes in and is fully committed to improving Health, Safety, and Environment standards to achieve sustainable HSE performance. Process Safety & Behavior Based Safety across the organization is ensured through HSE Management System integrated with the company's organization scheme and the Company is on track for continuous improvement with a focus to achieve & sustain leadership levels. The Company has a dedicated Health, Safety & Environment department manned by subject matter experts. We have engaged a top-notch HSE expert in the development of behavioral-based safety culture to create a sustainable and safe working environment for our people, customers, contractors, and the community.

Implementation of focused safety programs, environmental standards, and strong visible leadership resulted in yet another year without any major incidents. Your company continued to comply with National Environmental Quality Standards including best practices for air emissions, noise, portable water, and industrial effluent. The Company received a third consecutive year Corporate Social Responsibility Award at the National Forum for Environment and Health (NFEH). The Company is operating an incident management program using "Safesite" as a tool. It assists in reporting unsafe acts and conditions, near misses and incidents as well as ensuring the key learnings are shared across the organization.

The Company conducted environmental monitoring in compliance with Sindh Environmental Protection Agency (SEPA) requirements at ISL Factory & Service Centre for the year 2022-23.

Energy Management

The company's **19 MW** co-generation power plant continued to operate satisfactorily, the heat recovered in the process meets most of the utility needs of the process and in line with our practice, excess energy is supplied to K- Electric.

Financials

The Company has successfully upheld favorable profit margins despite the economic crisis.

For the current fiscal year, the company has reported a revenue of **Rs. 76.7 billion**, accompanied by a gross margin of **13.8%**, exhibiting resilience in these challenging times. The company has posted **Rs. 3.5 billion** profit after tax after taking a charge of **Rs. 486 million** of a last minute super tax of **10%**.

The company efficiently managed its working capital, leading to the generation of cash flows. Additionally, the company retired its long term KIBOR based loan early, resulting in significant financial cost savings.

مالیات

کمپنی نے معاشی بحران کے باوجود منافع کا سازگار مارجن کامیابی سے برقرار رکھا ہے۔ موجودہ مالی سال کمپنی نے مجموعی طور پر 76.7 ارب روپے کی آمدنی حاصل کی اور ساتھ ہی 13.8 فیصد مجموعی مارجن حاصل کیا، جو بحران میں استحکام کا استعارہ ہے۔ کمپنی نے 10 فیصد سپر ٹیکس کے نفاذ کی مد میں 486 ملین روپے کے نقصان کے بعد 3.5 ارب روپے کا بعد از ٹیکس منافع حاصل کیا ہے۔

کمپنی نے اپنے ورکنگ کپٹل کا مؤثر طریقے سے انتظام کیا، جس سے کیش فلو پیدا ہوا۔ مزید برآں، کمپنی نے اپنے طویل مدتی KIBOR پر مبنی قرض کو جلد ادا کر دیا، جس کے نتیجے میں اہم مالیاتی لاگت کی بچت ممکن ہوئی۔

آپریشنل سرگرمیوں سے، کمپنی نے 22.3 ارب روپے کا مضبوط کیش فلو مستحکم کیا اور مالی سال 2022-23 میں کامیابی سے اپنے مجموعی طویل اور مختصر مدتی قرضہ جات میں 16.8 ارب روپے کم کیے۔ انتظامیہ نے موثر انوینٹری مینجمنٹ کے ذریعے ورکنگ کپٹل مینجمنٹ پر توجہ مرکوز رکھی اور جون 2022 کے آخر میں 30 ارب روپے کی انوینٹری کم کر کے جون 2023 کے آخر میں 17 ارب روپے تک پہنچا دیا۔

سال بھر میں اوسطاً 28 فیصد مہنگائی بڑھنے کے سبب پچھلے سال کے 4,349 ملین روپے کے مقابلے میں تبادلوں کی لاگت 4.8 فیصد بڑھ کر 4,557 ملین روپے ہو گئی۔

فروخت اور مال برداری کے اخراجات گزشتہ سال 1,563 ملین روپے کے مقابلے میں 36 فیصد کم ہو کر 997 ملین روپے ہو گئے، جہاں انتظامی اخراجات 14 فیصد سے بڑھ کر 389 ملین روپے ہو گئے۔

دیگر آپریشنل اخراجات 42 فیصد یعنی 1,922 ملین روپے ہو گئے، بنیادی طور پر شرح مبادلہ میں انتہائی اتار چڑھاؤ یعنی (205 روپے سے 286 روپے فی امریکی ڈالر) کی وجہ سے 1,479 ملین روپے کا تبادلاتی نقصان ہوا۔

مالیاتی چارجز پچھلے سال کے 1,323 ملین روپے کے مقابلے میں 2,264 ملین روپے رہے۔ اس اضافے کی وجہ بنیادی طور پر زیادہ شرح سود اور HRC کی درآمدات پر 100 فیصد نقد مارجن کی ضرورت کے نفاذ کو قرار دیا جاسکتا ہے، جس سے ورکنگ کپٹل کی ضروریات پر دباؤ برقرار رہا۔ مزید برآں، کمپنی نے آخری دنوں میں نافذ ہونے والے 10 فیصد سپر ٹیکس کی مد میں 486 ملین روپے کی ادائیگی کی اور 3.5 ارب روپے کا بعد از محصولات منافع ظاہر کیا۔

ڈائریکٹرز کی رپورٹ

انٹرنیشنل اسٹیلز لمیٹڈ کے ڈائریکٹرز 30 جون 2023ء کو ختم ہونے والے مالی سال کے لئے آڈٹ شدہ مالیاتی گوشواروں کے ساتھ سولہویں سالانہ رپورٹ پیش کرتے ہوئے پُرمسرت ہیں۔

فولاد سازی کا عالمی منظر نامہ

اس سال عالمی سطح پر فولاد کی قیمتیں تقریباً 49 فیصد تک گر گئیں، جو کہ موجودہ سال 1,100 امریکی ڈالر فی میٹرک ٹن کی بلند ترین سطح تک جانچ پڑتال تھیں۔ بنیادی خام مال خاص طور پر خام فولاد اور کولے کی قیمتوں میں ایک واضح نشیبی فرق دیکھنے میں آیا۔ عالمی منڈی 2022-23 کی پہلی ششماہی میں کمزور رہی لیکن مالی سال کے آخر تک 650 امریکی ڈالر فی میٹرک ٹن پر بحال ہو گئی۔

عالمی اعتبار سے خام اسٹیل کی پیداوار سال کے دوران 1.8 ارب میٹرک ٹن رہی، جو گزشتہ سال کی اسی مدت میں 1.9 ارب میٹرک ٹن کی پیداوار کے مقابلے میں 5 فیصد کم رہی۔ اسٹیل کی عالمی منڈی میں چین کی برتری برقرار رہی، تاہم اس کی کل پیداوار 1,018 ملین میٹرک ٹن سے بڑھ کر 1,035 ہو گئی اور عالمی پیداوار میں اس کا مجموعی حصہ گزشتہ سال کے 54 فیصد سے بڑھ کر 56 فیصد ہو گیا۔

قومی معیشت

پاکستان کی معیشت کو گزشتہ سال کے دوران شدید مسائل کا سامنا رہا، جن میں سیلاب کی تباہ کاری، اشیاء کی قیمتوں میں انتہائی اتار چڑھاؤ، اور سخت بیرونی اور مقامی مالیاتی حالات جیسے مسائل نمایاں رہے۔ یہ عوامل وبائی صورت حال کے بعد بحالی میں خلل کا سبب بنے اور اس کے نتیجے میں افراط زر میں ہوشربا اضافہ ہوا اور زرمبادلہ کے ذخائر میں نمایاں کمی واقع ہوئی۔ مٹینری اور خام مال کی درآمد میں درپیش مسائل، پیداوار میں قلت کے باعث عارضی طور پر پلانٹ بند کرنے کے متعدد اعلانات، اقتصادی سست روی کا باعث بنے۔

ان اقدامات سے کرنٹ اکاؤنٹ خسارہ گزشتہ سال کے 17 ارب امریکی ڈالر سے کم ہو کر 2.5 ارب امریکی ڈالر ہو گیا، تاہم، ان عوامل کی وجہ سے سخت مالی حالات، قرض کے زائد اخراجات، خاص طور پر بڑے پیمانے پر پیداواری صنعت کے لئے کاروباری مانگ میں کمی کا سبب بنے رہے۔

کاروباری جائزہ

یوکرین کی جنگ نے ترسیل رسد میں خلل ڈالا، جس کی وجہ سے اشیاء کی عالمی قیمتوں میں اضافہ ہوا۔

افراط زر کے اس دباؤ نے ملک کے گرتے ہوئے زرمبادلہ کے ذخائر کو مزید گھٹا دیا جس کے نتیجے میں زرمبادلہ کے ذخائر میں زبردستی واقع ہوئی۔ نتیجتاً مرکزی بینک نے افراط زر میں کمی روکنے کے لئے سال کے دوران کئی بار شرح سود میں اضافہ کیا اور زرمبادلہ کے غیر مستحکم ذخائر بچانے کے لئے درآمدات سے متعلق انتظامی اقدامات نافذ کیے۔ درآمدی پابندیوں نے مرکزی بینک کو کرنٹ اکاؤنٹ بیلنس کم کرنے کا موقع فراہم کیا لیکن خام مال کی خریداری میں صنعت کی رسائی محدود ہو گئی، جس سے مجموعی جی ڈی پی میں بڑے پیمانے پر کمی واقع ہوئی۔ اسی طرح، شرح سود میں اضافے کے سبب بجٹ خسارہ کم کرنے کے لئے حکومتی مالیاتی ضروریات میں نمایاں اضافہ ہوا، جسے ٹیکسوں میں اضافے کے ذریعے پورا کیا گیا۔

تاہم، کمپنی نے ان مشکل حالات میں بھی اپنی تمام تر توجہ مؤثر طریقے سے انوینٹری مینجمنٹ اور کیش مینجمنٹ پر مرکوز رکھی۔ انتظامیہ نے فعال آپریشنل کارکردگی کے ذریعے، توانائی کے محدود استعمال کے منصوبے لاگو کر کے اور صرف اہم سرمایہ کاری کے منصوبوں پر عمل درآمد کے ذریعے کاروبار مزید بہتر بنایا۔ ان اقدامات کے سبب کمپنی کے کیش میں قابل قدر اضافہ سمیت قرضوں کی سطح میں بھی واضح کمی ہوئی۔

کمپنی انوینٹری ریشٹلائزیشن کی بنیاد پر سکڑتی ہوئی بد حال معیشت میں بھی اپنا مارکیٹ شیئر بڑھا کر مجموعی طور پر نمایاں مارجن برقرار رکھنے میں کامیاب رہی۔ نیز، پیداواری اقدامات اور مؤثر مینوفیکچرنگ اپروچز کے ذریعے یقینی بنایا گیا کہ انتہائی بلند افراط زر کے ساتھ بھی پیداواری لاگت ہمہ وقت معقول رہے۔

فروخت

مالی سال 2022-23 میں، مجموعی طور پر کاروباری حجم میں 36 فیصد کی خاطر خواہ کمی کے باعث، فروخت میں کمی دیکھی گئی اور فانا/پائیا میں ٹیکس چھوٹ کے بے جا استعمال کے باوجود، آپ کی کمپنی نے گزشتہ سال کی نسبت اس برس اپنا مارکیٹ شیئر 31 فیصد سے 36 فیصد تک بڑھالیا۔ فروخت کا حجم 308,000 میٹرک ٹن رہا، جس میں ٹول مینوفیکچرنگ کے 8,000 میٹرک ٹن بھی شامل ہیں۔

شمالی امریکہ کی مارکیٹ کے سکڑاؤ اور بین الاقوامی اسٹیل کی قیمتوں میں اتار چڑھاؤ کے ماحول میں بھی کمپنی کامیابی سے 48,000 میٹرک ٹن برآمد کرنے میں کامیاب رہی۔ مزید برآں، یہ بات بھی قابل ذکر ہے کہ کمپنی کی یہ کاوشیں چھیلیسویں FPCI بہترین ایکسپورٹ پر فارمنس ایوارڈ برائے 2020-21 اور 2021-22 KCCI بہترین ایکسپورٹ پر فارمنس ایوارڈ برائے 2019-20 اور 2020-21 میں تسلیم کی گئیں، جس نے برآمدات میں کمپنی کی لگن اور عمدہ کارکردگی اُجاگر کی۔

Although our raw materials, steel and zinc does not have a direct impact on environment, we believe in minimizing impact to the environment as a result of our operations. Most of the technologies and equipment in our operations are environmentally safe and compliant with international and national norms.

Clean Water and Sanitation

At ISL, we are committed to minimizing our environmental impact and ensuring access to clean water and sanitation. We recognize the importance of water and basic resources as fundamental human rights. To achieve this, ISL has been implementing various measures.

Effluent Treatment Plant:

To conserve the environment, ISL has installed an effluent treatment plant with a capacity of 600 m³/day. This plant effectively collects, neutralizes, and filters solvent-based waste generated during the manufacturing process. The treated water is discharged in compliance with The National Environmental Quality Standards.

- Sewage Treatment Plant:

ISL has also implemented a sewage treatment plant with a capacity of 90 m³/day. This facility treats all sewage from our operations. The treated water is reused for toilet flushing, landscape irrigation, and groundwater recharge, promoting sustainable water management.

- Reverse Osmosis (RO) Systems:

Our RO plants, with a combined capacity of 54 m³/day, ensure the removal of pollutants from well water. This purified water is then fully reusable within our facility, reducing our reliance on the city's main water supply system. The rejected water generated during the process is collected separately and treated by another RO plant with a capacity of 16 m³/day, making it reusable as well.

Acid Regeneration Plant (ARP):

To address the environmental concerns associated with the pickling process, ISL has an Acid Regeneration Plant. This facility recycles and reconditions hydrochloric acid (HCL) used to remove surface impurities from hot rolled steel coils. By reusing 98% of the acid, we minimize the direct disposal of spent acid and contribute to resource conservation.

At ISL, we continuously strive to improve our environmental practices and contribute to the goal of clean water and sanitation. We remain committed to sustainable water management and minimizing our impact on the environment through responsible operational practices.

Affordable and Clean Energy

ISL is committed to promoting affordable and clean energy solutions. We actively recover waste heat generated from our operations and utilize it for various purposes, contributing to energy efficiency and sustainability.

- Heat Absorption Chiller:

We employ a heat absorption chiller system that harnesses waste heat to generate chilled water for air-conditioning purposes. By utilizing this waste heat, we reduce the energy consumption required for cooling, making our operations more efficient and environmentally friendly.

- Steam Boiler:

To further maximize the use of waste heat, we employ a steam boiler that utilizes heat from exhaust gases to generate steam. This steam is then utilized in various operations within our facility. Additionally, we have implemented a 1.2 Mega Watt steam turbine that harnesses the power of the steam to generate electricity.

By harnessing waste heat and utilizing it effectively, we not only reduce our reliance on external energy sources but also contribute to the generation of clean energy.

Our commitment to affordable and clean energy drives our efforts to maximize energy efficiency and minimize our carbon footprint.

Climate Action

The company regularly organizes beach cleaning activities and plantation drives throughout the year. These activities aim to raise awareness among employees about the impact of green measures on the climate and the environment.

By engaging in beach cleaning and tree plantation, ISL actively contributes to preserving natural ecosystems and mitigating the effects of climate change.

In February 2023, ISL dedicated a day to educate families about the importance of eradicating deforestation, combating climate change, and improving the water table through tree plantation.

As part of this initiative, the company distributed over 5,000 Moringa Tree seeds and growing kits to families and children. These kits included terracotta pots, care guides, and potting material, enabling individuals to participate in tree planting and nurture the growth of useful native tree species.

This effort not only supports environmental conservation but also encourages community engagement and awareness about climate action. ISL has implemented an in-house co-generation power plant to address the energy shortage. This power plant, fuelled by natural gas and consisting of eight generators, generates 25 Mega Watts of power through co-generation.

By utilizing this power plant, ISL meets its energy requirements for the steel complex while also supplying surplus electricity to the national grid. This approach helps reduce the reliance on fossil fuels and promotes the use of more sustainable energy sources, contributing to climate action and reducing greenhouse gas emissions.

Responsible Consumption and Production

At ISL, we strive to maximize shareholder value and uphold highest standards of transparency and openness, while assuming the most stringent level of corporate governance.

INDEPENDENT AUDITORS' REPORT

To the members of International Steels Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the annexed financial statements of International Steels Limited (the Company), which comprise the statement of financial position as at June 30, 2023, and the statement of profit or loss and other comprehensive income, the statement of changes in equity, the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information, and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of the audit.

In our opinion and to the best of our information and according to the explanations given to us, the statement of financial position, statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes forming part thereof conform with the accounting and reporting standards as applicable in Pakistan and give the information required by the Companies Act, 2017 (XIX of 2017), in the manner so required and respectively give a true and fair view of the state of the Company's affairs as at June 30, 2023 and of the profit and other comprehensive income, the changes in equity and its cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants as adopted by the Institute of Chartered Accountants of Pakistan (the Code) and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

A.F. FERGUSON & CO.

Following is the key audit matter:

S. No. Key audit matter

- (i) **Revenue from contracts with customers**
(Refer note 3.10 and note 24 to the financial statements)

The Company recognizes revenue from the sale of cold rolled, galvanized and colour coated steel coils and sheets to domestic as well as export customers when the performance obligation is satisfied by transferring control of a promised good to the customer. During the year, net sales to the domestic and export customers have decreased significantly by 11.6% and 33.2%, respectively, which is substantially due to decrease in quantity sold.

We considered revenue recognition as a key audit matter due to revenue being one of the key performance indicators of the Company and for the year revenue has decreased significantly as compared to the last year. In addition, revenue was also considered as an area of significant audit risk as part of the audit process.

How the matter was addressed in our audit

Our audit procedures amongst others included the following:

- evaluated management controls over revenue and checked their validation;
- performed verification of sales with underlying documentation including gate pass, delivery order and invoice;
- performed cut-off procedures on sample basis to ensure sales has been recorded in the correct period;
- verified that sales prices are negotiated and approved by appropriate authority;
- recalculated the commission as per Company's policy and verified related distribution expenses; and
- ensured that presentation and disclosures related to revenue are being addressed appropriately.

Information Other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

A.F. FERGUSON & CO.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our

A.F. FERGUSON & CO.

conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the board of directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the board of directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Based on our audit, we further report that in our opinion:

- proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);
- the statement of financial position, the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes thereon have been drawn up in conformity with the Companies Act, 2017 (XIX of 2017) and are in agreement with the books of account and returns;
- investments made, expenditure incurred and guarantees extended during the year were for the purpose of the Company's business; and
- zakat deductible at source under the Zakat and Ushr Ordinance, 1980 (XVIII of 1980), was deducted by the company and deposited in the Central Zakat Fund established under section 7 of that Ordinance.

The engagement partner on the audit resulting in this independent auditor's report is Syed Muhammad Hasnain.

2. BASIS OF PREPARATION

2.1 Statement of compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards as applicable in Pakistan comprise of:

- International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017; and
- Provisions of and directives issued under the Companies Act, 2017.

Where the provisions of and directives issued under the Companies Act, 2017 differ with the requirements of IFRS, the provisions of and directives issued under the Companies Act, 2017 have been followed.

2.2 Basis of measurement

These financial statements have been prepared under the historical cost convention except for the Company's liability under defined benefit plan (gratuity) that is determined based on the present value of defined benefit obligation less fair value of plan assets, freehold land and buildings thereon that are stated at fair values determined by an independent valuer.

2.3 Functional and presentation currency

These financial statements are presented in Pakistan Rupees, which is the Company's functional currency. All amounts have been rounded off to the nearest thousand, unless otherwise indicated.

2.4 Use of significant estimates and judgments

The preparation of financial statements in conformity with accounting and reporting standards, as applicable in Pakistan, requires management to make judgements, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates underlying the assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. Information about the judgements made by the management in the application of the accounting policies, that have the most significant effect on the amount recognized in these financial statements, assumptions and estimation uncertainties with significant risk of material adjustment to the carrying amount of assets and liabilities in future periods are described in the following notes:

- Lease liability and Right-of-use assets (note 3.1)
- Property, plant and equipment (note 3.2)
- Intangible assets (note 3.3)
- Trade debts, advances (note 3.4.2.1)
- Stores and spares (note 3.5)
- Stock-in-trade (note 3.6)
- Taxation (note 3.7)
- Staff retirement benefits (note 3.8)
- Impairment (note 3.12)
- Provisions (note 3.13)
- Contingent liabilities (note 3.14)

2.5 Changes in accounting standards, interpretations and pronouncements

a) Standards and amendments to approved accounting standards that are effective

There are certain amendments and interpretations to the accounting and reporting standards which are mandatory for the Company's annual accounting period which began on July 1, 2022. However, these do not have any significant impact on the Company's financial reporting.

b) Standards and amendments to approved accounting standards that are not yet effective

There is a standard and certain other amendments to the accounting and reporting standards that will be mandatory for the Company's annual accounting periods beginning on or after July 1, 2023. However, these are considered either not to be relevant or to have any significant impact on the Company's financial statements and operations and, therefore, have not been disclosed in these financial statements.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The summary of significant accounting policies and methods of computations adopted in the preparation of these financial statements are same as those applied in the preparation of the annual financial statements of the Company for the year ended June 30, 2022.

3.1 Lease liability and Right-of-use assets

The Company, as a lessee, has recognized right-of-use assets representing its right to use the underlying assets and lease liabilities representing its obligations to make lease payments.

At inception of a contract, the Company assesses whether a contract is, or contains a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration. The Company mainly leases properties for its operations. The Company recognizes a right-of-use asset and lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, and subsequently at cost less any accumulated depreciation and impairment losses if any, and adjusted for certain remeasurements of the lease liability. The right-of-use asset is depreciated using the straight line method over the shorter of the lease term and the asset's useful life. The estimated useful lives of assets are determined on the same basis as that for owned assets. In addition, the right-of-use asset is periodically reduced by impairment losses, if any.

The Company has various lease agreements for head office and sales offices which were previously classified by the Company based on its assessment of whether the lease transferred substantially all of the risks and rewards of ownership. Under IFRS 16, the Company recognizes right-of-use assets and lease liabilities for all the leases - i.e. these leases are on statement of financial position.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date discounted using the interest rate implicit in the lease or if that rate cannot be readily determined, the entity's incremental borrowing rate being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions. The lease liability is subsequently increased by the interest cost on the lease liability and decreased by lease payments made. It is re-measured when there is a change in future lease payments arising from a change in an index or rate, a change in assessment of whether extension option is reasonably certain to be exercised or a termination option is reasonably certain not to be exercised. The corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit and loss if the carrying amount of right-of-use asset has been reduced to zero.

Lease liabilities include the net present value of the following lease payments:

- Fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- Variable lease payment that are based on an index or a rate;
- Amounts expected to be payable by the lessee under residual value guarantees;
- The exercise price of a purchase option if the lessee is reasonably certain to exercise that option; and
- Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

Right-of-use assets are measured at cost comprising the following:

- The amount of the initial measurement of lease liability;
- Any lease payments made at or before the commencement date less any lease incentives received;
- Any initial direct costs; and
- Dismantling costs and restoration costs.

The company has not elected to recognise right-of-use assets and lease liabilities for short-term leases of properties that have a lease term of 12 months or less and leases of low-value assets. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

3.2 Property, plant and equipment

3.2.1 Operating assets and depreciation

Initial recognition

The cost of an item of property, plant and equipment is recognized as an asset if it is probable that future economic benefits associated with the item will flow to the entity and the cost of such item can be measured reliably.

Recognition of the cost in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by the management.

Measurement

Property, plant and equipment (except freehold land and buildings) are stated at cost less accumulated depreciation and impairment losses, if any. Freehold land are stated at revalued amounts and buildings on freehold land are stated at revalued amounts less accumulated depreciation and accumulated impairment, if any. The costs of property, plant and equipment include:

- (a) its purchase price including import duties, non-refundable purchase taxes after deducting trade discounts and rebates;
- (b) any other costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management; and
- (c) Borrowing costs, if any.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Subsequent expenditure

Expenditure incurred to replace a significant component of an item of property, plant and equipment is capitalized and the asset so replaced is retired. Other subsequent expenditure is capitalized only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the items can be measured reliably. All other expenditure (including repairs and normal maintenance) is recognized in the statement of profit or loss as an expense when it is incurred.

Depreciation

Depreciation on all items except for freehold land is charged on straight line method at the rates specified in note 4.1 to the financial statements and is generally recognized in statement of profit or loss.

Depreciation on addition is charged from the month the asset is available for use up to the month prior to disposal.

Depreciation methods, useful lives and residual values of each part of property, plant and equipment that is significant in relation to the total cost of the asset are reviewed, and adjusted if appropriate, at each reporting date.

Revaluation surplus

Revaluation of freehold land and buildings on freehold land is carried out with sufficient regularity to ensure that the carrying amount of assets does not differ materially from the fair value. Any revaluation increase in the carrying amount of freehold land and buildings on freehold land is recognized, net of tax, in other comprehensive income and presented as a separate component of equity as "Revaluation surplus on property, plant and equipment" except to the extent that it reverses a revaluation decrease / deficit for the same asset previously recognized in the statement of profit or loss, in which case the increase is first recognized in the statement of profit or loss to the extent of the decrease previously charged.

Any decreases that reverse previous increases of the same asset are first recognized in other comprehensive income to the extent of the remaining surplus attributable to the asset, all other decreases are charged to statement of profit or loss. The revaluation reserve is not available for distribution to the Company's shareholders. Each year, the difference between depreciation based on the revalued carrying amount of the asset charged to statement of profit or loss and depreciation based on the asset's original cost, net of tax, is reclassified from revaluation surplus to retained earnings.

Gains and losses on disposal

Gains and losses on disposal of assets are taken to the statement of profit or loss, and the related surplus on revaluation of property, plant and equipment, if any, is transferred directly to retained earnings.

3.2.2 Capital work-in-progress

Capital work-in-progress is stated at cost less impairment loss, if any and consists of expenditure incurred (including any borrowing costs, if applicable) and advances made in the course of their construction and installation. Transfers are made to relevant asset category as and when assets are available for intended use.

Advances paid to suppliers for acquisition of property, plant and equipment including land and building is also classified under capital work-in-progress.

3.3 Intangible assets

An intangible asset is recognized as an asset if it is probable that future economic benefits attributable to the asset will flow to the entity and the cost of such asset can be measured reliably.

Costs directly associated with identifiable software that will have probable economic benefits exceeding one year, are recognized as an intangible asset.

Indefinite intangible assets

These are stated at cost less impairment, if any.

Definite intangible assets

- a) These are stated at cost less accumulated amortization and impairment, if any.
- b) These are amortized on straight line basis over its estimated useful life(s) of these assets (refer note 6).
- c) Amortization on additions during the year is charged from month in which the asset is intended to use, whereas no amortization is charged from the month the asset is disposed-off.

3.4 Financial instruments

3.4.1 Initial measurement of financial asset

The Company classifies its financial assets into following three categories:

- fair value through other comprehensive income (FVOCI);
- fair value through profit or loss (FVTPL); and
- at amortized cost.

A financial asset is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition.

Subsequent measurement Debt investments at FVOCI

These assets are subsequently measured at fair value. Interest / markup income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in the statement of profit or loss. Other net gains and losses are recognized in other comprehensive income. On de-recognition, gains and losses accumulated in other comprehensive income are reclassified to the statement of profit or loss.

Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognized as income in the statement of profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in other comprehensive income and are never reclassified to the statement of profit or loss.
Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest / markup or dividend income, are recognized in statement of profit or loss.
Financial assets measured at amortized cost	These assets are subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses, if any. Interest / markup income, foreign exchange gains and losses and impairment, if any, are recognized in the statement of profit or loss.

3.4.2 Non-derivative financial assets

All non-derivative financial assets are initially recognized on trade date i.e. date on which the Company becomes party to the respective contractual provisions. Non-derivative financial assets comprise loans and receivables that are financial assets with fixed or determinable payments that are not quoted in active markets and include trade debts, deposits, advances and cash and cash equivalents. The Company derecognises the financial assets when the contractual rights to the cash flows from the asset expires or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risk and rewards of ownership of the financial assets are transferred or it neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control over the transferred asset.

3.4.2.1 Trade debts, advances and other receivables

These are classified at amortized cost and are initially recognized when they are originated and measured at fair value of consideration receivable. These assets are written off when there is no reasonable expectation of recovery. Actual credit loss experience over past years is used to base the calculation of expected credit loss.

3.4.2.2 Cash and cash equivalents

For the purpose of presentation in statement of cash flows, cash and cash equivalents includes cash in hand, balances with banks and short term borrowings availed by the Company, which are repayable on demand and form an integral part of the Company's cash management.

3.4.3 Financial liabilities

Financial liabilities are initially recognized on trade date i.e. date on which the Company becomes party to the respective contractual provisions. Financial liabilities include mark-up bearing borrowings, unclaimed / unpaid dividend, accrued mark-up, lease liability and trade and other payables. The Company derecognizes the financial liabilities when contractual obligations are discharged or cancelled or expired. Financial liabilities other than at fair value through profit or loss are initially measured at fair value less any directly attributable transaction cost. Subsequent to initial recognition, these liabilities are measured at amortized cost using effective interest rate method.

3.4.3.1 Mark-up bearing borrowings and borrowing costs

Mark-up bearing borrowings are recognized initially at fair value, less attributable transaction costs. Subsequent to initial recognition, mark-up bearing borrowings are stated at amortized cost, while the difference between the cost (reduced for periodic payments) and redemption value is recognized in the statement of profit or loss over the period of the borrowings using the effective interest rate method.

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of the relevant asset.

3.4.3.2 Trade and other payables

Trade and other payables are recognized initially at fair value plus directly attributable costs, if any, and subsequently measured at amortized cost.

3.4.3.3 Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognized when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Company performs under the contract.

3.4.4 Derivative financial instruments - other than hedging

Derivatives that do not qualify for hedge accounting are recognized in the statement of financial position at estimated fair value with corresponding effect to statement of profit or loss. Derivative financial instruments are carried as assets when fair value is positive and liabilities when fair value is negative.

3.4.5 Derivative financial instruments - cash flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in fair value of the derivative is recognized in other comprehensive income and accumulated in hedging reserve. Any ineffective portion of changes in fair value of derivative is recognized immediately in statement of profit or loss. The amount accumulated in equity is removed therefrom and included in the initial carrying amount of non-financial asset upon recognition of non-financial asset.

The fair value of forward exchange contracts is estimated using appropriate valuation techniques. These are carried as assets when the fair value is positive and liabilities when the fair value is negative.

3.4.6 Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the financial statements only when the Company has currently legally enforceable right to set-off the recognized amounts and the Company intends either to settle on a net basis or to realized the assets and to settle the liabilities simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in normal course of business and in the event of default, insolvency or winding up of the Company or the counter parties.

3.5 Stores and spares

Stores and spares are stated at lower of weighted average cost and net realizable value, less provision for impairment, if any. Items in transit are valued at cost comprising invoice value plus other charges incurred thereon.

Provision is made for obsolete and slow moving stores and spares and is recognized in the statement of profit or loss.

3.6 Stock-in-trade

These are valued at lower of cost and net realizable value. Cost is determined under the weighted average basis. Cost comprises all costs of purchase, conversion and other costs incurred in bringing the inventories to their present location and condition. Raw material in transit comprise of invoice value and other charges thereon. Net realizable value signifies the estimated selling price in the ordinary course of the business less net estimated cost of completion and selling expenses. Scrap and by-product is valued at estimated realizable value.

3.7 Taxation

Income tax expense comprises current and deferred tax. Income tax expense is recognized in the statement of profit or loss, except to the extent that it relates to items recognized directly in equity or in other comprehensive income, in which case it is recognized in equity or in other comprehensive income respectively. In making the estimates for income taxes currently payable by the Company, the management considers the current income tax law and the decisions of appellate authorities on certain issues in the past.

3.7.1 Current tax

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable or receivable in respect of previous years.

Provisions for current taxation is based on taxability of certain income streams of the Company under presumptive / final tax regime at the applicable tax rates and remaining income streams chargeable at current rate of taxation under the normal tax regime and / or minimum tax liability or alternate corporate tax as applicable, after taking into account tax credits and tax rebates available, if any. Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realized the asset and settle the liability.

3.7.2 Deferred tax

Deferred tax is recognized using balance sheet liability method, providing for temporary difference between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using the tax rates enacted or substantively enacted at the reporting date.

The Company recognises a deferred tax asset to the extent that it is probable that taxable profits for the foreseeable future will be available against which the assets can be utilized. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

3.8 Staff retirement benefits

3.8.1 Defined benefit plan

The Company provides gratuity benefits to all its permanent employees who have completed their minimum qualifying period of service i.e. three years (except in case of workers where minimum qualifying period of service is six months). For executives and officers having total service of over twenty years, the benefit is available at one month's basic salary (eligible salary) for each completed year of service. For executives and officers having total service of less than twenty years, the benefit is available at half month's basic salary (eligible salary) for each completed year of service. For workers, the benefit is available at one month's gross salary less conditional allowances (eligible salary) for each completed year of service. The Company's obligation is determined through actuarial valuations carried out under the 'Projected Unit Credit Method'. Remeasurements which comprise actuarial gains and losses and the return on plan assets (excluding interest) are recognized immediately in other comprehensive income.

The Company determines the net interest expense / (income) on the net defined benefit liability / (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability / (asset), taking into account any changes in the net defined benefit liability / (asset) during the period as a result of contribution and benefit payments. Net interest expense and current service cost are recognized in statement of profit or loss. The latest actuarial valuation was conducted at the reporting date by a qualified professional firm of actuaries.

The actual return on plan assets represent the difference between the fair value of plan assets at the beginning and end of the year and adjusted for contributions and benefits paid.

3.8.2 Defined contribution plan

The Company provides provident fund benefits to all its officers. Equal contributions are made, both by the Company and the employees, at the rate of 8.33% of basic salary and cost of living allowance and the same is charged to the statement of profit or loss.

3.8.3 Compensated absences

The liability for accumulated compensated absences of employees is recognized in the period in which employees render service that increases their entitlement to future compensated absences.

3.9 Foreign currency transactions and translation

Transactions in foreign currencies are translated into Pakistan Rupees at the rates of exchange approximating those prevailing on the date of transactions. Monetary assets and liabilities in foreign currencies are translated into Pak Rupees at the rates of exchange ruling on the reporting date. Exchange differences are included in the statement of profit or loss.

3.10 Revenue recognition

- Domestic sales are recognized as revenue when invoiced with the transfer of control of goods, which coincides with delivery, as this is the point in time that the consideration becomes unconditional, because only the passage of time is required before the payment is due.
- Export sales are recognized as revenue when invoiced with the transfer of control of goods, which coincides either with the date of bill of lading or upon delivery to customer or its representative, based on terms of arrangement.
- Revenue from power generation plant on account of sales of surplus electricity is recognized on transmission of electricity to K-Electric Limited.
- Toll manufacturing / partial manufacturing income is recognized when related services are rendered.

No element of financing is deemed present as the sales are made with a credit term of up to 120 days, which is consistent with the market practice.

3.11 Income on bank deposits and finance cost

The Company's finance income and finance cost includes income on bank deposits and finance cost. Income or expense is recognized using the effective interest rate method.

3.12 Impairment

3.12.1 Financial assets

The Company recognises loss allowances for Expected Credit Losses (ECLs) in respect of financial assets measured at amortized cost.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balance for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowances for trade debts are always measured at an amount equal to lifetime ECLs.

The expected loss rates are based on the payment profiles of sales over a period of 36 - 60 months before June 30, 2023 or July 1, 2022 respectively and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the debts. The Company has identified the Gross Domestic Product (GDP) and the unemployment rate of the countries in which it sells its goods to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than past due for a reasonable period of time. Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovery of a financial asset in its entirety or a portion thereof. The Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

The adoption of the expected loss approach has not resulted in any material change in impairment provision for any financial asset.

A financial asset is considered irrecoverable (default event) when the counterparty fails to make contractual payments within one year of when they fall due.

3.12.2 Non-financial assets

The carrying amounts of the Company's non-financial assets, other than stores and spares, stock in trade and deferred tax are reviewed at each reporting date to determine whether there is any indication of impairment. If such indication exists, the asset's recoverable amount, being higher of value in use and fair value less costs to sell, is estimated. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets. An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognized in the statement of profit or loss.

3.13 Provisions

A provision is recognized in the statement of financial position when the Company has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation. Provisions are measured at the present value of expected expenditure, discounted at a pre-tax rate reflecting current market assessment of the time value of money and the risk specific to the obligation. However, provisions are reviewed at each reporting date and adjusted to reflect current best estimate.

3.14 Contingent liabilities

A contingent liability is disclosed when the Company has a possible obligation as a result of past events, whose existence will be confirmed only by the occurrence or non-occurrence, of one or more uncertain future events not wholly within the control of the Company; or the Company has a present legal or constructive obligation that arises from past events, but it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation, or the amount of the obligation cannot be measured with sufficient reliability.

3.15 Segment reporting

Segment results that are reported to the Company's Chief Executive Officer (CEO) - the chief operating decision maker include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items, if any, comprise mainly corporate assets, head office expenses, and tax assets and liabilities. Management has determined that the Company has a single reportable segment and therefore it has only presented entity wide disclosures.

The Company does not consider sale of electricity to K-Electric Limited (KE) as separate reportable segment as the power plant of the Company is installed primarily to supply power to its production facilities and currently any excess electricity is sold to KE.

3.16 Dividend and appropriations to / from reserves

Dividend distribution to the Company's shareholders and appropriations to / from reserves are recognized as a liability in the period in which these are approved.

3.17 Government grants

Government grants are transfers of resources to an entity by a government entity in return for compliance with certain past or future conditions related to the entity's operating activities - e.g. a government subsidy. The definition of "government" refers to governments, government agencies and similar bodies, whether local, national or international.

The Company recognises government grants when there is reasonable assurance that grants will be received and the Company will be able to comply with conditions associated with Grants.

Government grants are recognized at fair value, as deferred income, when there is reasonable assurance that the grants will be received and the Company will be able to comply with the conditions associated with the grants.

Grants that compensate the Company for expenses incurred, are recognized on a systematic basis in the income for the year in which the related expenses are recognized. Grants that compensate for the cost of an asset are recognized in income on a systematic basis over the expected useful life of the related asset.

A loan is initially recognized and subsequently measured in accordance with IFRS 9. IFRS 9 requires loans at below-market rates to be initially measured at their fair value - e.g. the present value of the expected future cash flows discounted at a market-related interest rate. The benefit that is the government grant is measured as the difference between the fair value of the loan on initial recognition and the amount received, which is accounted for according to the nature of the grant.

3.18 Share capital

Ordinary shares are classified as equity and recognized at their face value. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, if any.

The revaluation resulted in a surplus on revaluation amounting to Rs. 1,489.76 million which was incorporated in the books of the Company as at June 30, 2022.

The Company commissioned independent valuation of freehold land and buildings thereon after every three years, during the years ended June 30, 2013, June 30, 2016, June 30, 2019 and June 30, 2022.

11.2 Defined benefit scheme

Staff Gratuity Fund

11.2.1 As stated in note 3.8 the company operates approved funded defined benefit gratuity plan for all permanent employees meeting the specified criteria and defined contribution plan for all active employees subject to minimum service of prescribed period as per the respective trust deeds. 11.2.2 Plan assets held in trust are governed by local regulations which mainly include Sindh Trusts Act, 2020; the Companies Act, 2017; Income Tax Rules, 2002 and the Rules under the respective trust deeds. Responsibility for governance of the Plans, including investment decisions and contribution schedules, lies with the respective Board of Trustees. The Company appoints the trustees among its employees.

11.2.3 Risks on account of defined benefit plan

The Company faces the following risks on account of defined benefit plan:

Final salary risk - The risk that the final salary at the time of cessation of service is greater than what the Company has assumed. Since the benefit is calculated on the final salary, the benefit amount would also increase proportionately.

Asset volatility - Most assets are invested in risk free investments of 6 months, 3, 5 or 10 years Regular Income Certificates, Defence Savings Certificates, Treasury Bills and Government Bonds. However, investments in equity instruments is subject to adverse fluctuations as a result of change in the market price.

Discount rate fluctuation - The plan liabilities are calculated using a discount rate set with reference to market yields on government bonds. A decrease in market yields on government bonds will increase plan liabilities, although this will be partially offset by an increase in the value of the current plans' bond holdings.

Investment risks - The risk of the investment underperforming and not being sufficient to meet the liabilities. This risk is mitigated by closely monitoring the performance of investment.

Risk of insufficiency of assets - This is managed by making regular contribution to the Fund as advised by the actuary.

11.2.4 Funding

The gratuity plan is fully funded by the Company. The funding requirements are based on the gratuity fund's actuarial measurement framework set out in the funding policies of the plan. The funding is based on a separate actuarial valuation for funding purposes for which the assumptions may differ from the assumptions used in determining defined benefit liability. Employees are not required to contribute to the plan.

18. GAS INFRASTRUCTURE DEVELOPMENT CESS

The Honorable Supreme Court of Pakistan (SCP) has decided the Appeal against consumers upholding the vires of GIDC Act, 2015 through its judgement dated August 13, 2020. The Supreme court on November 02, 2020 ordered that their decision of August 13, 2020 has validated the GIDC Act, 2015 in complete sense and the benefits allowed under its Section 8(2) to the industrial sector is also available. Further, payment of due GIDC was allowed in 48 installments instead of 24 installments.

The Company has also filed a civil suit before the Honourable High Court of Sindh (SHC) on the ground that the Company has not passed on the burden of Cess. Stay order was granted in the aforesaid suit, which has been operative till the next date of hearing.

The Company has recognized GIDC payable with respect to its captive power plant used for self consumption. This payable has been revalued and recorded at its present value by discounting the future cash flows using three year PKRV rate and has booked income of Rs. 20.71 million (2022: Rs.49.42 million), which has been recorded as other income. The unwinding of the GIDC during the year amounts to Rs. 75.31 million (2022: Rs. 76.997 million).

The Company has not recognized GIDC amounting to Rs. 769 million (2022: Rs. 769 million) pertaining to period from 01 July 2011 to 31 Jul 2020 with respect to its captive power plant from which power generation is supplied to K-Electric Limited. Management considers that, in the event such levy is imposed, it shall recover GIDC from K-Electric Limited through fuel adjustments after getting requisite approval from National Electric Power Regulatory Authority (NEPRA).

Despite the speaking order dated August 13, 2020 by The Supreme court, the Federal Government did not initiate the gas project within six months, therefore, the Company has filed a petition in the SHC challenging the decision of the Supreme court.

- 19.1** The deferred tax assets and the deferred tax liabilities relate to income tax in the same jurisdiction, and the law allows net settlement. Therefore, they have been offset in the statement of financial position.
- 19.2** Deferred tax liability is restricted to 72.02% (2022: 72.80%) of the total deferred tax liability based on the assumptions that export sales will continue to fall under Final Tax Regime and the current trend of export and local sales ratio will continue to be the same in the foreseeable future.
- 19.3** Under the Finance Act, 2019, corporate rate of tax has been fixed at 29% for tax year 2020 and onwards. As per Finance Act, 2022, companies operating in certain sectors, including steel, are liable to pay super tax at 10% for tax year 2022 and upto 4% for tax year 2023 and onwards. However Finance Act, 2023 has introduced progressive rate on high earning persons ranging from 1% to 10% whereas on companies having income in excess of Rs. 500 million 10% super tax will be applicable. Such higher rate of tax has been made perpetual thus substantially increasing the overall tax costs for the businesses. Accordingly, deferred tax assets and liabilities have been recognized using the expected applicable rate.

Subsequently through Sindh Finance Act 2015 and 2016, the legislation has increased the rate to 1.25%.

However, the Sindh Infrastructure Development Cess Act, 2017 was declared constitutional with retrospective effect from 1994. The operation of the order remained suspended till September 3, 2021. - Credit risk
- Liquidity risk
- Market risk

Risk management framework

The Board meets frequently throughout the year for developing and monitoring the Company's risk management policies. The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Board Audit Committee oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company.

36.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations without considering the fair value of the collateral available there against.

36.1.1 Exposure to credit risk

The carrying amount of respective financial assets represent the maximum credit exposure. The maximum exposure to credit risk at the reporting date is as follows:

	Note	2023	2022
		(Rupees in '000)	
- Long term deposit with Central Depository Company of Pakistan Limited		100	100
- Trade debts	9	1,148,499	1,034,132
- Trade deposits and margin against shipping guarantee	10	28,494	44,194
- Receivable from K-Electric Limited		16,685	32,874
- Bank balances	13	1,765,136	896,462
		2,958,914	2,007,762

The Company does not take into consideration the value of collateral while testing financial assets for impairment. The Company considers the credit worthiness of counterparties as part of its risk management.

Long term deposit with Central Depository Company of Pakistan Limited (CDC)

This represents long term deposits with CDC. The Company does not foresee any credit exposure there against as the amounts are paid to counterparty as per agreement and is refundable on termination of the agreement with respective counterparty.

Trade debts

The Company's exposure to credit risk arising from trade debtors is mainly influenced by the individual characteristics of each customer. Majority of the Company's sales are made against receipts in advance from customers. The Company has no major concentration of credit risk with any single customer. The majority of the trade customers have been transacting with the Company for several years. The Company establishes an allowance for impairment where it considers recoveries are not probable.

Trade deposits

These represent deposits placed with various suppliers as per the terms of securing availability of services. The management does not expect to incur credit loss there against.

Receivable from K-Electric Limited

The receivable from K-Electric Limited amounting to Rs. 16.69 million (2022: Rs. 32.87 million) on account of electricity provided to it under an agreement from the power plant located at the factory site. The Company does not expect to incur credit loss against this receivable.

Analysis of gross amounts receivable from local and foreign trade debtors and from K-Electric Limited are as follows:

	2023	2022
	(Rupees in '000)	
Domestic	183,317	244,909
Export	981,867	822,097
	1,165,184	1,067,006

36.1.2 Impairment losses

The aging of trade debtors and receivable from K-Electric Limited (KE) at the reporting date was as follows:

	2023		2022	
	Gross	Impairment	Gross	Impairment
	(Rupees in '000)			
Not past due	1,105,732	-	679,081	-

Past due 61 + days	56	-	56	-
Total	1,165,184	-	1,067,006	-

Management believes that the unimpaired balances that are past due are still collectible in full, based on historical payment behaviour and review of financial strength of respective customers. Further, certain trade debtors are secured by way of Export Letter of Credit and Inland Letter of Credit which can be called upon if the counter party is in default under the terms of the agreement.

Cash is held only with reputable banks with high quality external credit rating assessed by external rating agencies. Following are the credit ratings of banks with which balances are held or credit lines available:

36.1.3 Concentration of credit risk

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Company's performance to developments affecting a particular industry. In order to avoid excessive concentrations of risk, management focuses on the maintenance of a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly. Management does not consider that it has any concentration of credit risk at the reporting date.

36.2 Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk arises because of the possibility that the Company could be required to pay its liabilities earlier than expected or there is difficulty in raising funds to meet commitments associated with financial liabilities as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company ensures that it has sufficient cash to meet expected working capital requirements by having credit lines available. The following are the contractual maturities of financial liabilities, including interest payments and excluding the impact of netting agreements:

36.2.1 The contractual cash flows relating to the above financial liabilities have been determined on the basis of mark-up rate effective as at June 30. The rate of mark-up has been disclosed in respective notes to these financial statements.

36.2.2 Long term financing from various banks contains certain loan covenants. A breach of covenant, in future, may require the Company to repay the respective loans earlier than as directed in the above table.

36.3 Market risk

Market risk is the risk which arises due to changes in market prices, such as foreign exchange rates, interest rates and equity prices, that will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company is exposed to currency risk and interest rate risk only.

Management assessed that the fair values of cash and cash equivalents and short-term deposits, receivable from K-Electric Limited (KE), trade debts, trade payables, short term borrowings and other current liabilities approximate their carrying amounts largely due to short-term maturities of these instruments. For long term deposit assets and long term liabilities, management considers that their carrying values approximate fair value owing to credit standing of counterparties and interest payable on borrowings is at market rate.

36.3.1 Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Exposure to currency risk

The Company is exposed to currency risk on trade debts, bank balances and trade creditors that are denominated in a currency other than the respective functional currency of the Company, primarily U.S. Dollar. The Company's exposure to foreign currency risk is as follows:

	2023		2022	
	Rupees	US Dollars	Rupees	US Dollars
	(Amounts in '000)			
Financial assets				
Bank balance	672,917	2,351	402,149	1,970
Trade debts	981,867	3,431	822,098	4,027
Financial liabilities				
Trade creditors	(3,351,210)	(11,693)	(153,380)	(750)
Net exposure	(1,696,426)	(5,911)	1,070,867	5,247

The following significant exchange rates applied during the year:

	Average rates		Reporting date rate	
	2023	2022	2023	2022
	(Rupees)			
US Dollars to PKR	245.59	181.04	286.60	204.59

Sensitivity analysis

A 10 percent strengthening / (weakening) of the Pak Rupee against the US Dollar at 30 June 2023 would have (decreased) / increased the profit by Rs. (114.99) million (2022: Rs. 72.44 million). This analysis assumes that all other variables, in particular interest rates, remain constant and the analysis is performed on the same basis as done in prior year.

36.3.2 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Interest rate exposure arises from short and long term borrowings from banks.

At the reporting date, the interest rate profile of the Company's interest-bearing financial instrument is:

	Carrying amount	
	2023	2022
	(Rupees in '000)	
Fixed rate instruments		
Financial liabilities	4,588,736	8,843,278
Variable rate instruments		
Financial liabilities	284,225	12,876,772

a) Cash flow sensitivity analysis for variable rate instruments

The Company holds various variable rate financial instruments amounting to Rs. 284.23 million (2022: Rs. 12,876.77 million) exposing the Company to cash flow interest rate risk. A change of 100 basis points as at 30 June 2023 would have increased / (decreased) profit after tax and equity by Rs. 2.02 million (2022: Rs. 91.43 million). This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

b) Fair value sensitivity analysis for fixed rate instruments

The Company does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore a change in interest rates at the reporting date would not affect the statement of profit or loss.

36.4 Reconciliation of movements of liabilities to cash flows arising from financing activities

Other price risk

Price risk is the risk that the fair value or future cash flows from a financial instrument will fluctuate due to changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. The Company has no exposure to price risk.

37. CAPITAL MANAGEMENT

The objective of the Company when managing capital is to safeguard its ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders and to maintain a strong capital base to support the sustained development of its businesses. The Company intends to manage its capital structure by monitoring return on capital, as well as the level of dividends to ordinary shareholders.

38. MEASUREMENT OF FAIR VALUES

Management engages an independent external expert / valuer to carry out valuation of its non-financial assets (i.e. Land and Building) and obtains rate from financial institution to value derivative financial instruments. Involvement of external valuers is decided by management. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

When measuring the fair value of an asset or a liability, the Company uses valuation techniques that are appropriate in the circumstances and uses observable market data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- **Level 1:** quoted prices (unadjusted) in active markets for identical assets or liabilities.
- **Level 2:** inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- **Level 3:** inputs for the asset or liability that are not based on observable market data (unobservable inputs).

As at June 30, 2023, all financial assets and financial liabilities are carried at amortized cost which is approximate to their fair value. The Company measures the Land and Buildings at fair value and all of the resulting fair value estimates in relation to Land and Buildings of the Company are included in Level 3.

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

For assets and liabilities that are recognized in the financial statements at fair value on a recurring basis, the management recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred. There were no transfers between different levels of fair values mentioned above.

The following table provides the valuation approach, inputs used and inter-relationship between significant unobservable inputs and fair value measurement of the Company's Land and Buildings measured at fair value:

Assets measured at fair value	Date of Valuation	Valuation approach and inputs used	Inter-relationships between significant unobservable inputs and fair value measurement
Revalued property, plant and equipment			
- Land and Building	June 30, 2022	The valuation model is based on price per square meter and current replacement cost method adjusted for depreciation factor for the existing assets in use. In determining the valuations for land and buildings, the valuer refers to current market conditions, structure, current replacement cost, sale prices of comparable land in similar location adjusted for differences in key attributes such as land size and inquires with numerous independent local estate agents / realtors in the vicinity to establish the present market value. The fair valuation of land and building is considered to represent a level 3 valuation based on significant non-observable inputs being the location and condition of the assets.	The fair value is subject to change owing to changes in input. However, management does not expect material sensitivity to the fair values arising from the non-observable inputs.

The fair value of land and buildings is a Level 3 recurring fair value measurement. A reconciliation of the opening and closing fair value is provided below:

	2023	2022
	(Rupees in '000)	
Opening net book value	6,583,869	5,248,331
Additions during the year	22,352	57,005
Depreciation for the year	(267,274)	(199,065)
Disposals during the year (at NBV)	(84)	(12,164)
Revaluation during the year	-	1,489,762
Closing net book value	6,338,863	6,583,869

Management assessed that the fair values of cash & cash equivalents, other receivable, receivables from K-Electric, trade deposits, trade debts, short term borrowings, trade and other payables, accrued mark-up, contract liabilities and unclaimed dividends approximate their carrying amounts largely due to short-term maturities of these instruments. For long term deposit and long term financing, management consider that their carrying values approximates fair value owing to credit standing of counterparties and interest payable on borrowings are market rates.

ہم یہاں انٹرنیشنل اسٹیلو لمیٹڈ کے ایسے تمام اراکین سے درخواست کرتے ہیں جو حصص کے سرٹیفکیٹ رکھتے ہیں کہ وہ اپنے حصص جلد از جلد بک انٹری کی صورت میں تبدیل کروائیں۔ انہیں سنٹرل ڈپازٹری سسٹم میں اکاؤنٹ کھولنے کے لئے سنٹرل ڈپازٹری کمپنی آف پاکستان لمیٹڈ یا پاکستان اسٹاک ایکسچینج کے کسی بھی فعال رکن/اسٹاک بروکر سے رابطہ کرنے کا مشورہ دیا جاتا ہے تاکہ حقیقی حصص سرٹیفکیٹس بک انٹری کی صورت میں تبدیل کئے جاسکیں۔
